Tan Ah Tuan is the Executive Vice President of Labs at Ensign Infosecurity since Nov 2021. At Ensign Labs, he leads a team of passionate and innovative researchers conducting R&D in Data Science/Cyber AI and Cyber Security Research and translating them into innovative cybersecurity solutions to detect advanced and emerging cyber threats.

Before joining Ensign, Ah Tuan held leadership roles with Singapore's Defence Science and Technology Agency (DSTA). He was DSTA's Group Technology Officer, Director Cybersecurity and Director Infocomm Infrastructure. As the Group Technology Officer, he was responsible for the management of all R&D projects, the competency development for emerging technologies, and the cybersecurity of DSTA's data and systems and projects managed by DSTA. As Director Cybersecurity, he led the development of cyber defence architecture and solutions for MINDEF/SAF Command, Control, Communications, Computers and Information Technology (C4IT)/Integrated Knowledge-based Command and Control (IKC2) systems and networks. He was instrumental in building up DSTA's competencies to support the growing demands for cyber solutions in defence.
